ABOUT CSA

Governments, corporations and non-profits worldwide demand results and the best performance from their operations. Whether executing core or support operational processes, buying and operating capital equipment, delivering products or services, saving lives or defending a nation, results and performance matter.

At CSA, we specialize in helping clients achieve the productivity and results they require from their operations. Our strategic and operational solutions help clients analyze, improve and execute their operations while enabling them to manage the trade-offs of cost, schedule and performance.

CSA Consulting Services help clients understand and improve their operational performance, analytic capabilities, business processes and project management execution. Our Business Management Services provide a professional staff to work in your organization to operate and manage an on-going operational business process. These services offer clients the insight, answers and results they expect and need in order to deliver on their commitments.

Client Solution Architects
